

Pediatric Transplant Trainee Research Award

Best Pediatric Transplant Abstract(s)

Applications for the 2017 Annual Meeting are now being accepted.

One of the missions of the CST Pediatric Group is to encourage trainee participation in clinical and basic science research in the field of pediatric transplantation.

Prizes Available

Up to 2 prizes will be awarded by the CST Pediatric Group for the best trainee **pediatric abstracts** submitted to the CST 2017 Annual Meeting.

Adjudication process

All abstracts will be reviewed and scored by the CST Pediatric Group Executive committee members and/or invited expert reviewers. Abstract reviewers will be blinded to the author's name. Abstract score from general CST meeting abstract review will be available to the pediatric award review committee. The committee will be asked to consider relevance to pediatrics and scientific merit and will score and rank each abstract according to a standard scoring strategy. A minimum acceptable score will be set in order for the abstract to be eligible for the prizes. The two top ranked abstracts (one in the basic science category and one in the clinical category) will be awarded \$1000 each. If there is no submitted abstract in the category that meets the minimum acceptable score, no prize will be awarded in that category.

Eligibility

- Eligible candidates are trainees in the field of pediatric transplantation, at the undergraduate, graduate or post-graduate levels. Medical students, medical and surgical residents and fellows, basic scientists in training, and allied health trainees are encouraged to apply.
- *Applicants must be members of the CST (Trainee membership fee is \$50)*
- *Applicants' research supervisor must be a current member of the CST (though does not need to be a pediatric member)*
- *Abstract must have pediatric relevance*
